64bit

**"only 6% of companies suffering from a catastrophic data loss survive, while 43% never reopen and 51% close within two years."**

**Source: University of Texas Study for CIO Magazine**

That means that 94% of business fail, almost half of those within 24 hours! Running a business is hard enough, why not avoid a huge risk?

Most businesses depend on their information for income, savings, payroll, retirement and taking care of their families. Losing data can cause businesses to fail.
