"only 6% of companies suffering from a catastrophic data loss survive, while 43% never reopen and 51% close within two years."

Source: University of Texas Study for CIO Magazine

That means that 94% of business fail, almost half of those within 24 hours! Running a small business is hard enough, why not avoid a huge risk?

Most small business owners depend on their business for income, savings, kids education, retirement and taking care of their families. Losing data can cause many problems for a business.
